| 00% | 00% | 00% | 00% | 00% | 00% | 00% | 00% |

**Forecast for Saturday 06 Jul 2024**

**Weather:** Overnight cloud and outbreaks of heavy rain, possibly thundery, will slowly clear during Saturday morning. Becoming brighter with a mixture of sunny spells and blustery showers in the afternoon. The showers are likely to be heavy and possibly thundery at times, with the risk of hail. Any showers gradually easing by the evening, becoming largely dry, with some bright/clear spells developing.

**Chance of cloud-free hill tops above 800m:** 40% early morning, then >95% thereafter.

**Low Cloud and visibility:** Cloud lowering to cover hills above 400-500m overnight and early morning, slowly lifting to above the summits as rain clear away to the east. Cloud bases largely staying above the summits through the day. However, cloud bases could temporarily cover the summits in heavy showers during the day. Poor visibility at first, improving as the rain clears to see generally very good visibility, falling to poor or very poor in heavy showers.

| **Freezing Level*** | 1700m | 1600m | 1500m | 1400m | 1500m | 1600m | 1700m | 1800m | 1800m |

**Level above which ground is expected to be frozen/snow is expected to settle.*

**Meteorologist's View**

High UV levels are forecast, with sunny spells in between heavy showers and thunderstorms, so sun protection is recommended. Heavy showers and thunderstorms will lead to some dangerous conditions on the summits, with the risk of frequent lightning, gusty winds and hail, during the day. Feeling rather chilly on the summits, so packing extra clothing is advised, as well as, suitable footwear.

**Forecast for Sunday 07 Jul 2024**

**Weather:** Largely dry with some clear spells overnight, which will lead to a bright start on Sunday. However, the clouds will begin to bubble up to give another day of sunny spells and scattered showers. The showers are likely to be heavy and thundery at times, with risk of hail. Any showers gradually easing by the evening, becoming largely dry with some brighter spells. Staying dry with clear spells after dark.

**Maximum wind:** Southwesterly 101-5mph, occasionally gusts 20-25mph.

**Chance of cloud-free hill tops above 800m:** 60% at first, generally >95% during the day.

**Low Cloud and visibility:** Cloud lowering to above 500m first thing, then generally lifting above the summits during the day. Occasionally lowering to the summits in heavy showers. Visibility will be moderate or poor in heavy showers throughout the day, but generally, good or very good outside of showers.

**Temperature:** **Valleys:** Plus 10 Celsius, becoming Plus 14 Celsius.
**At 800m:** Plus 4 Celsius, becoming Plus 7 Celsius.
**Freezing level:** Above the summits.
